---

Here are some more comments to the document. I agree with Susan. Matt thanks for all of your efforts on this site. We need to continue to get this presentable because David is wanting to give something to the Mayor. I sent the Draft tonight to see if there is anything that can be used tonight, but I believe that we will need something presentable tomorrow.

Ronnie

**Subject:** Re: DRAFT Discussion Document

I think an overall note at bottom of options section should be added about the topography and difficulty of getting equipment to appropriate portions of site as needed. Tx u. Susan

Matt

My quick review:

- 1) no need to include owner names
- 2) does using foam and water require injection? If so, you have the same problem with drilling and that discussion should be included.
- 3) on sampling results, we need to be clear on the results.

Thanks  
Ronnie

Please find attached the draft document I have sent to David and Thabet.

They will review and comment once they reach Chicago around 8:30 this evening.

One additional question I asked for the document is what would be the differences if any between returning the material to the site vs destruction of material or off-site disposal

Also, I am beginning to put together a matrix with all of the options we have discussed or received.
